Corpus Christi Texas,
Nov, 30th 1928,

Mr J.C, Collier,
Barnesville,
Ga.

Dear Jene:-

Your letter of Nov. 15th Gladly received, I located back in this City the first of Sept. I would rather live here than any other part of the state,

Texas made a very good cotton crop this year, infact it made good in all crops I dont know of any part of the State, that you might say that is in a bad condition, The farmer here in this section as a rule all have good credit at the banks, and it seames they all have to borrow money to make there crop with, you take the big farmer here that runs four or five thousands acres he never come out with enough to make the next crop with,

There is agreat deal of empoovment going on here I left here four years ago, there was about fifteen thousand population and now it has about thirty thousand, there are from two to three boats in here ever week, loading cotton and other mds. We have plenty of natural gas, water supply is good, and in afew years I think we will have some manufacturs located here,

I would like very much to make a visit out there infact I started to come out there this last summer, after I give up my possition in Jacksonville, and try to locate in some City out there, my friend Mr Dunne here wanted me to work for him, but I will make a change any time that I can do better, If you ever have a chance at any of those Undertakers in Atlanta, wish you would feel around if you ever have the time,

I am expecting Mother down here this next week and I hope she will spend the winter with us, her health is mighty good at her age, I am leaving about the 10th of Dec. for my annual hunt for about ten days,

Lutie health is not good, have her under the doctors care most of the time, I am feeling fine,

With best regards to all the family,

Yours Truly,

Box 668.
